Style

The window takes every colour, font and radius from a token set, not from constants scattered in the widget code. The tokens live in `src/ui/theme/`: `tokens.py` defines the field names, `dark.py` and `light.py` fill them, `manager.py` swaps the active set and re-applies it. Switching a theme is a swap with no restart.

Palette — dark (default)

The Madrigal identity: a warm near-black background, one bordeaux accent. The surfaces are layered by depth: the layer closest to the reader (menus, tooltips) is the lightest, the window is the darkest. No surface is pure black and no text is pure white.

Token	Field	Value
Background	`background`	`#141210`
Panel	`surface`	`#1C1917`
Panel, alternate	`surface_alt`	`#171412`
Panel, elevated	`surface_elevated`	`#242019`
Border	`border`	`#322D28`
Accent	`accent`	`#7A1224`
Accent hover	`accent_hover`	`#A8391F`
Accent gradient	`accent_gradient`	`#4A0A16` → `#6C1020` → `#A8391F`
Text	`text_primary`	`#E6E1DB`
Secondary text	`text_secondary`	`#A8A099`
Muted text	`text_muted`	`#8C857E`

Palette — light

An alternative for bright rooms and printed screenshots. Same field names, only the values change, so a widget reads the same token in either theme.

Token	Field	Value
Background	`background`	`#FAFAFA`
Panel	`surface`	`#FFFFFF`
Panel, alternate	`surface_alt`	`#F5F5F5`
Border	`border`	`#E0E0E0`
Accent	`accent`	`#8B0A28`
Accent hover	`accent_hover`	`#6D071F`
Accent gradient	`accent_gradient`	`#6D071F` → `#8B0A28` → `#A2391D`
Text	`text_primary`	`#1A1A1A`
Secondary text	`text_secondary`	`#4A4A4A`

Status colours

Status colours mark a verdict, never decorate. Each set has a fill (behind bytes) and a text variant for the same verdict; the light set uses light fills with dark text, the dark set uses muted fills with light text. The names are `status_matched`, `status_mismatched`, `status_ambiguous`, `status_incomplete`, `status_uncovered`, `status_not_applicable`, `status_outdated`, plus `gap` and `hypothesis`. Green, yellow and red appear only through these tokens.

Typography

- Headings: Tektur, weights Medium (500) and SemiBold (600).
- Body: Montserrat, weights Regular (400) and SemiBold (600).
- Monospace: `DejaVu Sans Mono` (`font_mono`), used by the hex view.
- Line height: 1.3.
- Both display fonts are from Google Fonts, OFL licensed; the `.ttf` files and their licence texts live in `assets/fonts/`.

Geometry

- Corner radius: 4 px (`radius` token), at most 5 px.
- Spacing unit: 4 px (`spacing_unit` token).
- No pill buttons.
- No soft shadows.
- No gradients except the accent gradient.
- Dense modular grid.

Zoom

- **Ctrl +** and **Ctrl −** step the byte size within 8–28 px and move the tree two points behind it, so the two never drift apart; **Ctrl 0** restores the defaults (13 px bytes, 11 px tree). The steps are clamped at the limits and the menu entries disable when a limit is reached.

Rules

- No emoji.

- No exclamation marks.
- No friendly tone.
- Status colours are used for statuses only, never as decoration.
- No jargon humor.

Brand confirmation

The palette and the two typefaces are not a guess: they match the public website of the case owner, as saved from the live page.

Item	Value (as shipped)	Value on the site
Background	`#141210`	`#131516`
Panel	`#1C1917`	`#1D1D1D`
Light card	`#E8E8E8`	`#E8E8E8`
Accent	`#7A1224`	`#6D071F`
Accent gradient	`#4A0A16` → `#6C1020` → `#A8391F`	`#410913` → `#610D1C` → `#A2391D`
Text	`#E6E1DB`	`#E0E0E0`
Secondary text	`#A8A099`	`#9F9F9F`
Headings	Tektur (500, 600)	Tektur (500, 600)
Body	Montserrat (400, 600)	Montserrat (400, 600)

The shipped tokens are perceptually warmer than the site values on purpose, so the interface reads as one material rather than as flat web colours; the hue and the accent are the same. The `.ttf` files live in `assets/fonts/`. The site logo, its square mark and three abstract background textures are kept under `presentation/assets/`; see `presentation/assets/brand/README.md`. No portrait of a person from the site is included.
