Documentation index

Entry point. The project has many documents (53 in each language: 45 in `docs/` and 8 in the root, with a parallel Russian set in `docs/ru/`); this page is the map: what to read, when, and what of it is machine-checked.

If you are new here

1. ../README.md — what the tool does and its three invariants.
2. PROJECT_MAP.md — the whole picture in 15 minutes.
3. ../BUILD.md — build, tests, artefacts.
4. verification/matrix.md — what proves that it works.

Map by question

Question	Document
What it is and how to use it	../README.md, USAGE.md, demo.md, demo_cli.md
How the system is built	../ARCHITECTURE.md, PROJECT_MAP.md
Why the decisions were made	ARCHITECTURE_DECISIONS.md
Format and rule contracts	CONTRACT.md, PROTOCOL_API.md, CAPTURE_API.md, schemas/
Interpretation rules v1/v2	RULE_V1_V2.md
The corpus and its analysis	CORPUS_ANALYSIS.md, REAL_CORPUS_ANALYSIS.md, DATASET_INVESTIGATION.md, REFERENCE_INVESTIGATION.md
Metrics and benchmarks	METRICS.md, BENCHMARK.md
The web interface	WEB.md
The interface and its checks	UI_TESTING.md, GUI_VERIFICATION.md, UX_COHERENCE_PLAN.md
Installation and artefacts	INSTALL.md, BINARY.md
Portability	PORTABILITY.md
Settings	SETTINGS.md
Style and development	STYLE.md, DEVELOPMENT.md, GIT_HYGIENE.md
The boundaries of the project	BEYOND_SCOPE.md
Audit and compliance	AUDIT.md, STACK_COMPLIANCE.md, INTEGRATION_CHECKLIST.md
Defence and demonstration	DEFENSE_CHECKLIST.md, DEFENSE_FAQ.md, DEMO_CHEATSHEET.md, FAQ_FOR_JUDGES.md, PRESENTATION_VERIFICATION.md, SUBMISSION.md
Plans and progress	ROADMAP.md, ../PROGRESS.md, ../CHANGELOG.md
Module specifications	modules/, modules/module-map.md
Build and checks	../BUILD.md, verification/matrix.md

Two languages

`docs/*.md` is the English set, `docs/ru/*.md` the Russian one. The rule: a change to a contract or to behaviour updates **both** sets. Language parity is no longer a manual promise — it is checked by `make docs-check` (`tools/docs_pdf.py --check`): every document must have a translation in the other language and a PDF in both.

Rules

1. A document that claims behaviour must have a row in verification/matrix.md.
2. A new module is described following modules/module-template.md; the presence of the 11 sections is checked by `make docs-check`.
3. Links point only at the current repository address (`ForgeLabHub/ForgeMadrigalProtocolLab`); `make docs-check` verifies that.

Project management

- `forge.sh` / `forge.bat` — start, stop, logs, tests, the database and containers with one command; see the section in the README.
